

# CONTERRA DARK FIBER

## PUTS YOU IN CONTROL

Whether you need to comply with stringent regulatory requirements or are expecting explosive bandwidth growth, Conterra's dark fiber gives you full control over the equipment selection, design, deployment, management, maintenance and security of your network.

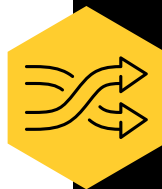

## NETWORK SPECIFICATIONS

- Bandwidth is only limited by the equipment you deploy.
- IEEE G.652.D-compliant fiber, the gold standard for terrestrial transmissions.
- 100% buried fiber delivers higher resiliency.
- Flexible power and space options.
- Available as a segment, ring, or custom-designed network.
- Generous access to manage and maintain your strands.

### SCALABLE

Deploy and control your own line systems and scale into the hundreds of Terabits per second.

### FLEXIBLE

Light a segment, a ring or design a full network.

### EXPERIENCED

Benefit from over three decades delivering on your power, space and accessibility needs.
