

400G Wave Services

CON TERRA
NETWORKS
Fiber Driven. People Powered.

It's no longer enough to provide high bandwidth and capacity. Customers expect more. Conterra is poised to respond with flexible service to satisfy your specific requirements.

The Flexibility You Need

Network availability and flexibility are critical in a competitive marketplace where strong customer and employee experiences are paramount. With wavelength services, you can help these businesses help deliver scalable, redundant solutions without red tape and costly infrastructure updates.

Flexible Speeds

Ultra-fast, low-latency speeds from 10G to 400G that can adapt as your needs change.

Agile Activation

Adaptable infrastructure scales in hours or days - not weeks or months.

Custom Design

An experienced team works with you to find the optimal path and engineer the best routes to meet your needs.

Flexible Routes

Unique routes across Louisiana, Texas, and North Carolina help build resiliency through diversity.

High Performance

Uncompromising SLAs and some of the shortest available routes ensure the shortest possible latency.

Custom Terms

Structure your deal to match your unique business needs and those of your customers.

More Options, More Places
