MANAGED WI-FI

Enterprise-Grade Wireless Solutions for Today's Connected Organization

Transform your workplace with comprehensive Wi-Fi management that delivers reliable, secure connectivity while reducing IT complexity and operational costs.

Unreliable Wi-Fi isn't just an inconvenience — it's a barrier to success. Organizations need robust wireless solutions that can support ever-increasing device loads and bandwidth demands without straining IT resources.

Conterra's Managed Wi-Fi provides a complete solution with strategically deployed access points, 24/7 expert support, and active monitoring, enabling businesses of all sizes to focus on their core mission rather than network management.

Conterra Managed Wi-Fi at a Glance

COMPLETE COVERAGE
Strategically placed access points ensure seamless connectivity throughout your premises, eliminating dead zones and connectivity gaps.

ACTIVE MONITORING
Round-the-clock monitoring and maintenance via our Managed Services Portal help prevent issues before they impact your operations.

ENTERPRISE SECURITY
Advanced security protocols and continuous updates protect your network while providing appropriate access levels for all users.

SCALABLE INFRASTRUCTURE
Flexible architecture adapts to your growing needs, from supporting additional devices to expanding coverage areas.

SIMPLIFIED ADMINISTRATION
Single-point management interface and comprehensive support reduce IT overhead and streamline network operations.

PERFORMANCE ANALYTICS
Detailed insights into network usage and performance help optimize your wireless infrastructure for maximum efficiency.

Conterra Managed Services Portal:

Elevate your managed Wi-Fi experience.
Instant insights. Simplified control. Unmatched connectivity.

The Conterra Managed Services Portal provides a centralized platform for monitoring and managing your Managed Wi-Fi network. With real-time data and intuitive dashboards, you can track performance metrics, identify and address issues, and plan for necessary upgrades. The portal is designed to simplify network oversight, ensuring reliable and efficient Wi-Fi connectivity across your organization.

Get a Complete Picture of Your Managed Wi-Fi Health at a Glance

Managed Wi-Fi Faster. Stronger. Easier.	• Wireless devices performance • Traffic	• Active devices • Threat detection • Connected clients	• Roaming activity • Configuration details

Real-Time Insights, Real-World Benefits

IMPROVE USER EXPERIENCE

Optimize your weak signal and help users experience fewer dropped calls, jittering videos, or frustrating app buffering.
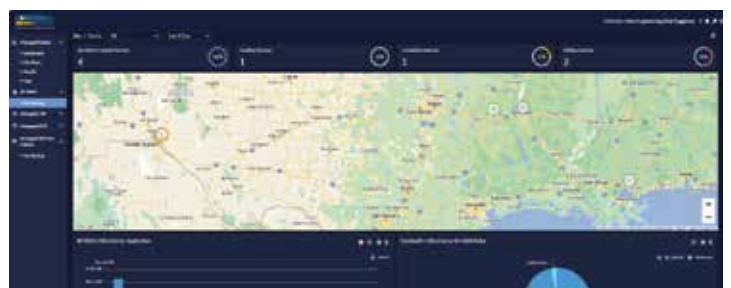

ENHANCE SECURITY

See suspicious activity, identify unauthorized devices on your network, and take immediate steps to mitigate risks and protect your data.

REDUCE DOWNTIME

Swiftly identify and resolve network bottlenecks and potential hardware issues to minimize interruptions and maintain smooth operations.

SAVE MONEY

Identify bandwidth-intensive applications, pinpoint inefficient network configurations, and eliminate other costly inefficiencies.

Effortlessly streamline your network management with Conterra's Managed Services Portal, designed to put you in control of your Managed Wi-Fi. Monitor performance, make quick adjustments, and ensure your Wi-Fi network delivers optimal connectivity and reliability — all from one smart, user-friendly platform.
