

Conterra Specialty Lines

KEY BENEFITS

- ✓ **Compatibility**
- ✓ **Fire and Building code compliant**
- ✓ **Reliable 24-hour battery backup**
- ✓ **24/7 remote out-of-band monitoring**
- ✓ **Cellular backup**
- ✓ **Advanced security with end-to-edge encryption**
- ✓ **PCI compliance**
- ✓ **HIPAA compliance**

Specialty Lines are based on a Class 5 Softswitch that fully emulates a central office delivering a high level of service quality and reliability, allowing alarm providers a code-compliant network handoff.

Futureproofed

Simple migration from legacy POTS to digital lines

Best-in-class components

Lower Costs

Remove high-cost TDM with fixed and predictable costs

Fully managed solution reduces staffing needs

Reliable

Carrier class platform and MFVN solution

Automatic LTE failover with multiple carriers

Battery backup

Easy to Launch & Scale

Professional program management & install

All CPE provided

Critical systems are monitored and maintained 24/7

Specialty Lines solves for common use cases

Fire Alarm Security Alarm

Legacy Alarm Panels were designed for Analog/TDM. Attempting to connect over SIP will commonly result in errors

Elevator Phone

Legacy Elevator Phones were designed for Analog/TDM. Attempting to connect over SIP will commonly result in errors

Fax

Faxes were designed to transmit and accept over Analog lines using TDM connectivity. When using IP to attempt to recreate this environment, there is a risk that the codec will fail

Point of Sale Machine

Older POS stations were Analog Only and designed for Analog/TDM. Attempting to connect over SIP will commonly result in errors

TIME TO GET OFF THE POTS.
